

SME Business Continuity

From just £12.95 per month

“Award Winning” Business Continuity for the UK SME Market

What is Business Continuity?

We think ‘survival’ should be the primary objective for any business.

Ever wondered how you would recover your own business operations if you were unfortunate enough to experience an unwanted incident, like a fire, flood, denial of access, or major IT or telecoms failure?

Put simply, “Business Continuity is about understanding the most critical areas of your business operations and ensuring you can protect or recover them in a timely manner, with minimal impact on your organisation following an incident.

Who Are We?

Easy Continuity is able to bring you inexpensive solutions and services – which only cost money when you need them. Even then, your business interruption insurance should cover it.

Our UK wide network of business continuity & office providers, IT recovery specialists and continuity experts make us the perfect choice for protecting your small business at an incredibly low cost.

Take a look at our website or get in touch.

What are the benefits?

- Maintain business survival
- Protect revenue, cash flow, customer base, brand and reputation
- Create confidence amongst the supply chain & customers
- Minimise business impact by getting critical functions and activities up and running as soon as possible
- There's no need to sign a formal contract, simply sign up and pay monthly using our secure checkout.
- Support from continuity experts with over 15 years experience in the industry, independently accredited to the Business Continuity Institute

Prices & Packages

Our packages are simple, very affordable and payable monthly.

Starting at only £12.95 for 10 employees, with scaled options for up to 50 staff.

Would you like to offer our service to your entire client base? Then get in touch.

In terms of setting expectation, its important to remember that this service is designed to be used 'post incident' and to start getting a business back on its feet within 24-36hrs. It should not be regarded as a cheaper replacement for organisations that require a fully tested, more costly and faster recovery service.

If you do need a quicker recovery time, or something bespoke – we can still help.
